98. homebuyers have an indoor radon test performed prior to purchase or taking occupancy, and recommends
99. having the radon levels mitigated if elevated radon concentrations are found. Elevated radon concentrations can
100. easily be reduced by a qualified, certified, or licensed, if applicable, radon mitigator.

101. Every buyer of any interest in residential real property is notified that the property may present exposure to
102. dangerous levels of indoor radon gas that may place occupants at risk of developing radon-induced lung cancer.

111. Statute 144.496 may bring a civil action and recover damages and receive other equitable relief as determined by

132. Property located at 44424 Dakota Valley Dr Dakota 55925

133. **G. NOTICE REGARDING AIRPORT ZONING REGULATIONS:** The Property may be in or near an airport safety zone
134. with zoning regulations adopted by the governing body that may affect the Property. Such zoning regulations are
135. filed with the county recorder in each county where the zoned area is located. If you would like to determine if such
136. zoning regulations affect the Property, you should contact the county recorder where the zoned area is located.
137. **H. NOTICE REGARDING CARBON MONOXIDE DETECTORS:**
138. MN Statute 299F.51 requires Carbon Monoxide Detectors to be located within ten (10) feet from all sleeping
139. rooms. Carbon Monoxide Detectors may or may not be personal property and may or may not be included in the
140. sale of the home.
141. **I. WATER INTRUSION AND MOLD GROWTH:** Studies have shown that various forms of water intrusion affect many
142. homes. Water intrusion may occur from exterior moisture entering the home and/or interior moisture leaving the
143. home.
144. Examples of exterior moisture sources may be
145. • improper flashing around windows and doors,
146. • improper grading,
147. • flooding,
148. • roof leaks.
149. Examples of interior moisture sources may be
150. • plumbing leaks,
151. • condensation (caused by indoor humidity that is too high or surfaces that are too cold),
152. • overflow from tubs, sinks, or toilets,
153. • firewood stored indoors,
154. • humidifier use,
155. • inadequate venting of kitchen and bath humidity,
156. • improper venting of clothes dryer exhaust outdoors (including electrical dryers),
157. • line-drying laundry indoors,
158. • houseplants—watering them can generate large amounts of moisture.
159. In addition to the possible structural damage water intrusion may do to the Property, water intrusion may also result
160. in the growth of mold, mildew, and other fungi. Mold growth may also cause structural damage to the Property.
161. Therefore, it is very important to detect and remediate water intrusion problems.
162. Fungi are present everywhere in our environment, both indoors and outdoors. Many molds are beneficial to humans.
163. However, molds have the ability to produce mycotoxins that may have a potential to cause serious health problems,
164. particularly in some immunocompromised individuals and people who have asthma or allergies to mold.
165. To complicate matters, mold growth is often difficult to detect, as it frequently grows within the wall structure. If you
166. have a concern about water intrusion or the resulting mold/mildew/fungi growth, you may want to consider having
167. the Property inspected for moisture problems before entering into a purchase agreement or as a condition of your
168. purchase agreement. Such an analysis is particularly advisable if you observe staining or any musty odors on the
169. Property.
170. **J. NOTICE REGARDING PREDATORY OFFENDER INFORMATION:** Information regarding the predatory
171. offender registry and persons registered with the predatory offender registry under MN Statute 243.166
172. may be obtained by contacting the local law enforcement offices in the community where the property is
173. located or the Minnesota Department of Corrections at (651) 361-7200, or from the Department of Corrections
174. web site at www.corr.state.mn.us.

188. that could adversely and significantly affect the Buyer's use or enjoyment of the Property or any intended use of

5. Minnesota Statute 1031.235 requires that, before signing an agreement to sell or transfer real property, Seller must disclose information in writing to Buyer about the status and location of all known wells on the property. This requirement is satisfied by delivering to Buyer either a statement by Seller that Seller does not know of any wells on the property, or a disclosure statement indicating the legal description and county, and a map showing the location of each well. In the disclosure statement Seller must indicate, for each well, whether the well is in use, not in use or sealed.

10. Unless Buyer and Seller agree to the contrary in writing, before the closing of the sale, a Seller who fails to disclose the existence or known status of a well at the time of sale, and knew or had reason to know of the existence or known status of the well, is liable to Buyer for costs relating to sealing of the well and reasonable attorneys' fees for collection of costs from Seller, if the action is commenced within six years after the date Buyer closed the purchase of the real property where the well is located.

15. Legal requirements exist relating to various aspects of location and status of wells. Buyer is advised to contact the local unit(s) of government, state agency, or qualified professional which regulates wells for further information about these issues.
